Essence

Electra M&E Polska was established in April 2016, built on the professional foundations laid by other installation companies. Headquartered in Warsaw, Electra M&E Polska operates throughout Poland, with branch offices in Wrocław and Poznań. The company has some 300 employees, comprising engineers, designers, technicians, supervisors, administrative staff, and management.

In the past years alone, Electra M&E Polska's staff has been involved in major projects throughout Poland, Germany and Lithuania..

The complete service range includes:

-  Technical consultancy
-  Comprehensive design services
-  Full installation and construction engineering
-  Complex project management
-  Project commissioning and initiation
-  Training technical service personnel
-  Warranty and post-warranty services

Every project is handled as a complete package, providing comprehensive services that include technical consultancy, design, engineering, project management, commissioning, training, and warranty/post-warranty services.

Many projects are carried out by Electra M&E Polska's expert installation teams, supported by experienced engineering and management staff. Working on both new and existing structures, including those presenting unique challenges, the Electra M&E Polska team delivers optimal system designs and exceptional installation quality every time.
