New order at the Towarowa 22 investment in Warsaw

Echo Investment S.A., in cooperation with AFI Europe Poland, has expanded the scope of work commissioned to the Electra M&E Polska Group on the "Towarowa 22" investment in Warsaw.

The additional task includes the installation of building automation for the "B" office building in the complex and will be carried out by IPID Engineering.

Thus, three companies forming the Electra M&E Polska group will be involved in the implementation of this investment:

Electra M&E Polska - mechanical installations and coordination of the entire works;
GEO-KAT - power electrical installations;
IPID Engineering sp. z o.o. - building automation installations.

Completion of the shell&core work is planned for early 2025.

"The expansion of the scope of work on the Towarowa 22 project is proof of the trust our clients have in us. We are proud that our companies can contribute to the realization of this prestigious project. This is an opportunity for us to demonstrate the broad competence of the entire group in providing the highest quality installation solutions," emphasizes Robert Protynsky, CEO of Electra M&E Poland.

Thank you for your trust!
