Heating & Cooling Installations

Electra M&E Polska installs complex heating, cooling, and refrigeration systems for buildings and industrial facilities of all sizes, including:

Cooling and refrigeration:

- Ammonia systems for the food industry
- Freon/ammonia systems for cooling storage and process lines
- Freon/water systems for precision air conditioning (server rooms and data centers)
- Freon/water systems for standard cooling installations

Heating:

- Complex heating installations
- Boiler rooms
- Heat exchange and heat recovery systems
- Heating pumps and solar heating systems
- External heating pipe networks
